

## POSTERS ABOUT GLOBAL GOALS

### FINAL TASK

We have spent a week learning about the Global Goals, watching and reading different stories of people working to achieve the 2039 SDGs.

Now it's your turn to help to achieve the Global Goals. Invent, innovate and campaign in order to solve a problem that affects your community (school, neighborhood, town) related to the Global Goals.

First, you will have to research a problem related to the Global Goals that affect your community and then, in pairs elaborate a poster explaining to the rest of the school the solution you propose. Remember to include:

- How does the problem affect people's life? Find facts and figures (amount of people affected, money that could be saved, consequences of it...)
  
- Your creative but realistic solution: what to do? who can do it? how can people act in order to put into practice your solution?
  
- Pictures, images, drawings... Make it visual, it has to be attractive for everyone.
  
- Prepare a short speech to present your conclusions to the rest of the school.
  
- The most original posters will be displayed in some public spaces of the school and presented to other students. Their authors will get an additional mark.

**CREATIVITY IS OUR POWER!**
